

European representation in ITRS:

- three IC companies named ITWG members. To be kept in the information loop & web access
- one (1) speaker for each ITWG and IRC in meetings abroad. Coordinates European inputs and dissemination within European companies. Updated list prepared for ITRS web-page

1998 update:

- European IRC members do agree

March 99 proposal for 1999 ITRS:

- European IRC agrees to numbers
- two years or three years cycle needs more discussion
- Europe emphasizes importance of SoC (System on Chip, ASIC). Driven more by cost, design, test, market than by aggressive technology. Extra line besides DRAM / MPO in Overall Roadmap Table anticipated / to be discussed
