

## **Acknowledgements**

This roadmap is a compilation of the efforts from over 325 companies and 400 people on four continents. It was initiated at the 1998 Commercialization of Micro and Nano Technologies Conference (COMS) in San Diego. It was those conference participants, participants of other COMS events and members of MANCEF who over a four year period have worked diligently not only on the content but also the format of the first ever world wide industrial roadmap effort for a disruptive technology base. Many organizations contributed financially and more importantly with content over the last four years or this roadmap would not have become a reality.

Further, many organizations saw the value in such an international effort and contributed mightily. IVAM, MANCEF, Sandia National Laboratories, SEMI, TMP/Alcatel and others took the financial lead in its development. It was a SEMI employee, Ron Horwath, who put forth this concept, which kept faith with a line of SEMI presidents, namely Stan Myers and Bill Reed, who saw potential in the emerging Micro and Top-down Nano technologies. Other organizations soon followed. Dr. Job Elders, then president of TMP, dedicated facilities and money to the effort. IVAM, under the triumvirate of Rolf Dahlbeck, Christina Nuey and Helge Bohlmann did the same. Sandia National Laboratories, under the leadership of Al Romig, Don Cook, David Williams, Marion Scott, Regan Stinnnet, Jay Jakubczak, and others, soon followed. Supporting the effort for its entirety were the members and financial officers of the COMS series of conferences and its parent company, MANCEF.

Motorola and Analog were early contributors to the structure of the roadmap efforts. Students at many universities, most notable the University of New Mexico MOT program, assisted the chapter leaders in writing and rewriting the text. Our group of nearly seventy (70) chapter leaders cannot be acknowledged enough as we put them forth in alphabetical order here:

**Roger Allan, Roger Allan and Associates**  
**Martin Amersfoort, C2V**  
**Susanne Arney, Lucent Technologies, Bell Labs**  
**Arturo Ayon, Sony Semiconductor**  
**Stephen Bart, MST Partners**  
**Tony Beugelsdijk, Los Alamos National Laboratories**  
**Owen Bishop, Alcon Laboratories**  
**Peter Bley, Forschungszentrum Karlsruhe**  
**Helge Bohlmann, MicroTEC GmbH**  
**Joe Brown, Suss Microtec**  
**Bill Brox, IMEGO**  
**Scott Bryant, International Technology & Trade Ventures**  
**Janusz Bryzek, Transparent Networks, Inc.**  
**Phil Butler, LZT Technologies**  
**Mike Chapman, Motorola**  
**Dong-il “Dan” Cho, Seoul National University**

**Marcel Dierselhuis, Micro Montage**  
**Kees Eijkel, University of Twente - MESA**  
**Job Elders, C2V**  
**Doug Elerath, Djinco**  
**Dave Feicht, TechSearch International, Inc**  
**Dick Forbes, RG Forbes and Associates**  
**Patrick French, Delft University of Technology**  
**Robert Giasolli, Coventor**  
**John Gilbert, Coventor**  
**Roger Grace, Roger Grace & Associates**  
**Thomas Griego, Surfect Technologies**  
**Robert Haak, RH Associates**  
**Frank T. Hartley, Jet Propulsion Laboratory, California Institute of Technology**  
**Wahid Hermina, Sandia National Laboratories**  
**William Higdon, Agilent Technologies**  
**Jill Hruby, Sandia National Laboratories**  
**Jay Jakubczak, Sandia National Laboratories**  
**Sul Kassicieh, University of New Mexico**  
**Bruce Kirchoff, NJIT**  
**Ron Lawes, Rutherford Appleton Laboratory**  
**Jonathan D. Linton, Rensselaer Polytechnic Institute**  
**Brad Lyau, University of New Mexico**  
**Hari Mani Sr.,S.N. Bose Research Center**  
**Hariharan Mani, Microsystems Inc.**  
**Gail Massari, Coventor**  
**Sita Mani, Sandia National Laboratories**  
**Mark McNie, QinetiQ Ltd.**  
**Andrew McQuarrie, Surface Technology Systems**  
**Paul McWhorter, MEMX**  
**Mike Mignardi, Texas Instruments**  
**Dave Monk, Motorola**  
**Christina Nuey, IVAM**  
**Peter Podesser, EVG**  
**Bart Romanowicz, CFDRC**  
**Walter Roessger, SEMI**  
**Christian Schaefer, EV Group**  
**Marion Scott, Sandia National Laboratories**  
**Fred Sexton, Sandia National Laboratories**  
**Tej Sharma, Microsystems Tech, India**  
**James Smith, Transparent Networks**  
**Vincent Spiering, BBV/C2V**  
**Regan Stinnett, Sandia National Laboratories**  
**Inderpreet S. Thukral, IBM**  
**Murkuu Tilli, Okmetic**  
**David Tolfree, Technopreneur**  
**Henne van Heeren, Onstream BV**

**Srikanth Varma, University of New Mexico**  
**Steven T. Walsh, UNM, MANCEF**  
**Craig White, University of New Mexico**  
**David Williams, Ardesta**  
**James Wylde, Nortel**  
**Yuelin Yang, Chinese National Academy of Sciences**  
**Mike Young, ASCI**  
**Weijie Yun, Everest Technologies**
