

Table of Contents

Acknowledgements.....	i
Executive Summary.....	1
CHAPTER 1	
Introduction.....	26
1.0 The Nature of Microsystems	27
2.0 Disruptive Technology and Discontinuous Innovations	27
3.0 Our Goal	28
4.0 The Nature of Roadmaps	28
CHAPTER 2	
Commercialization of Microsystems.....	29
1.0 Introduction	35
2.0 The Microsystems Commercialization Process	35
3.0 Impediments to MST Commercialization	44
4.0 Commercialization Status of MST Applications	52
5.0 A Report Card On Overall MST Commercialization	60
6.0 Conclusions	64
7.0 References	66
CHAPTER 3	
Optical MEMS.....	70
1.0 Introduction	72
2.0 The MOEMS Market	75
3.0 OPTICAL NETWORK COMPETITION	92
4.0 Optical Switch Manufacturers	94
5.0 Specific Mergers in the Optics Industry	102
6.0 VCSEL Manufacturers	103
7.0 Addendum: Initiation Time of Various MEMS Devices	108
CHAPTER 4	
BioMEMS.....	109
1.0 Introduction	113
2.0 Bulk Micromachined, IC-Compatible bioMEMS	116
3.0 Surface Micromachined, IC-Compatible bioMEMS	123
4.0 LIGA Micromachined, Non-IC Compatible bioMEMS	132
5.0 Other Non-IC Compatible bioMEMS	141
6.0 DNA Arrays	145

7.0	Conclusion	154
8.0	References	155

CHAPTER 5

An Improved method and forecast for the world-wide market growth of MEMS.....158

1.0	Introduction	159
2.0	The Challenges in Forecasting MEMS	159
3.0	Forecast Method	161
4.0	Interpreting the Forecast Charts	162
5.0	Conclusions	172
6.0	References	173

CHAPTER 6

IC-Compatible and potentially IC-Compatible Microsystems Manufacturing.....174

1.0	Introduction	176
2.0	Silicon Device Fabrication Steps	186
3.0	Basic Micromachining Categories	198
4.0	Micromachined Devices	211
5.0	The Future	224
6.0	Bibliography	228

CHAPTER 7

Non-IC-Compatible Microsystems Manufacturing.....241

1.0	Introduction	243
2.0	The LIGA Process	244
3.0	Lithography	250
4.0	Electroplating and Electroforming	268
5.0	Injection Molding	273
6.0	Hot Embossing	280
7.0	Laser Micromachining	286
8.0	Precision Machining	293
9.0	Surface Milling	299
10.0	Micro-Stereolithography	302

CHAPTER 8

Design, Modeling, and Simulation.....320

1.0 CAD for MEMS Requirements	323
2.0 Verification and Validation	330
3.0 The Evolution of MEMS CAD	331
4.0 The MEMS CAD Market	333
5.0 Conclusion	334
6.0 References	335

CHAPTER 9

Microsystems Reliability, Test and Metrology.....337

1.0 Introduction	341
2.0 MEMS Reliability Process	346
3.0 MEMS Testing	354
4.0 Predictive Modeling	368
5.0 Statistical Characterization	372
6.0 Properties of Manufacturing Materials	375
7.0 Design for Reliability	380
8.0 MEMS and Metrology	384
9.0 Challenges in Packaging Reliability	386
10.0 Conclusions	390
11.0 References	391

CHAPTER 10

MEMS Packaging And Assembly.....395

1.0 Introduction and Background	398
2.0 Die Level	403
3.0 Bonding and Packaging	404
4.0 Device Level	405
5.0 Reliability and Media Compatibility	407
6.0 System Level	421
7.0 Standardization of Interfaces	422
8.0 Packaging Strategy and Trends	423
9.0 Packaging Types	433
10.0 Conferences and Symposia	434
11.0 Packaging and Assembly Services	434

CHAPTER 11
Status And Future Of Microsystems / MEMS Foundries.....435

1.0	Introduction	438
2.0	The 1999-2001 Investigations	439
3.0	General Status: 2000 Versus 1999	445
4.0	Trends in 2001	447
5.0	Foundry Model, Still Viable?	451
6.0	Foundry Market Needs	453
7.0	Conclusions	454
8.0	References	455

CHAPTER 12
MEMS/MST Cost Model.....456

1.0	Introduction	459
2.0	Benchmark Profitability Measures	459
3.0	Cost Structure Considerations	461
4.0	Degree of Vertical Integration	465
5.0	Cost Components of Production Steps	469
6.0	Cost-Structure Evolution	477
7.0	Pricing of MEMS Devices	478
8.0	Conclusion	481
9.0	Appendices	482

CHAPTER 13
Standards, Or Lack Thereof.....486

1.0	Introduction	490
2.0	The Case Against Standards	492
3.0	The Case for Standards	494
4.0	Microsystems Standardization Status	496
5.0	Bottlenecks to Standardization	505
6.0	Consensus Timeline for Standardization	508
7.0	Areas for Standards Development	509
8.0	The Simplest Solution Is the Best One	510
9.0	Conclusion	512
10.0	References	515

CHAPTER 14
Integration.....518

1.0	Introduction	522
-----	--------------	-----

2.0	Trends Driving Integration	523
3.0	Integration Typologies	526
4.0	The Pros and Cons	533
5.0	Device Types Driving Integration	533
6.0	Trends Against Integration	534
7.0	When to Provide an Integrated Monolithic Solution	535
8.0	What Exactly is Monolithic Versus Hybrid Integration?	535
9.0	Hybrid Versus Monolithic Design Choice	
	—Lessons From the IC Industry	537
10.0	Arguments for Hybrid Versus Monolithic	537
11.0	Current Status and Future Trends	542
12.0	Conclusions	545
13.0	References	547

CHAPTER 15

Glossary.....548

A-C	550
D-F	562
G-J	573
K-M	578
N-P	586
Q-S	597
T-V	607
W-Z	613
